OUTLINE

- 
- 01* INTRODUCTION
 - 02* SCOPE AND OBJECTIVE
 - 03* TECHNOLOGY STACK
 - 04* ARCHITECTURE
 - 05* PROCESS FLOW
 - 06* BENEFITS OF WEB3
 - 07* CONCLUSION

INTRODUCTION

Centralized social media lacks privacy, content ownership, and invites arbitrary censorship, urging a decentralized solution.

Our Next.js, Solidity, MongoDB, and IPFS-based platform prioritizes privacy, grants content ownership, and ensures a censorship-resistant environment.

Integrating technologies, our platform provides data control, enhanced security, and a democratic, user-centric social media experience.

SCOPE AND OBJECTIVES

Scope

Develop user-centric social media with Next.js, Solidity, MongoDB, and IPFS, focusing on privacy, content ownership, and censorship resistance.

Objective 1

Implement robust security via Ethereum smart contracts, ensuring encrypted data storage and transparent interactions for user trust.

Objective 2

Enable users with enhanced digital autonomy using IPFS for decentralized storage, ensuring ownership and control over data and interactions..

TECHNOLOGY STACK

React framework for scalable web apps,
ensuring a seamless user interface.

Decentralized protocol for secure, resilient
storage and sharing of content.

solidity

Secure language for decentralized app
development on Ethereum blockchain.

For ensuring secure and transparent
transactions in our decentralized social
media platform.

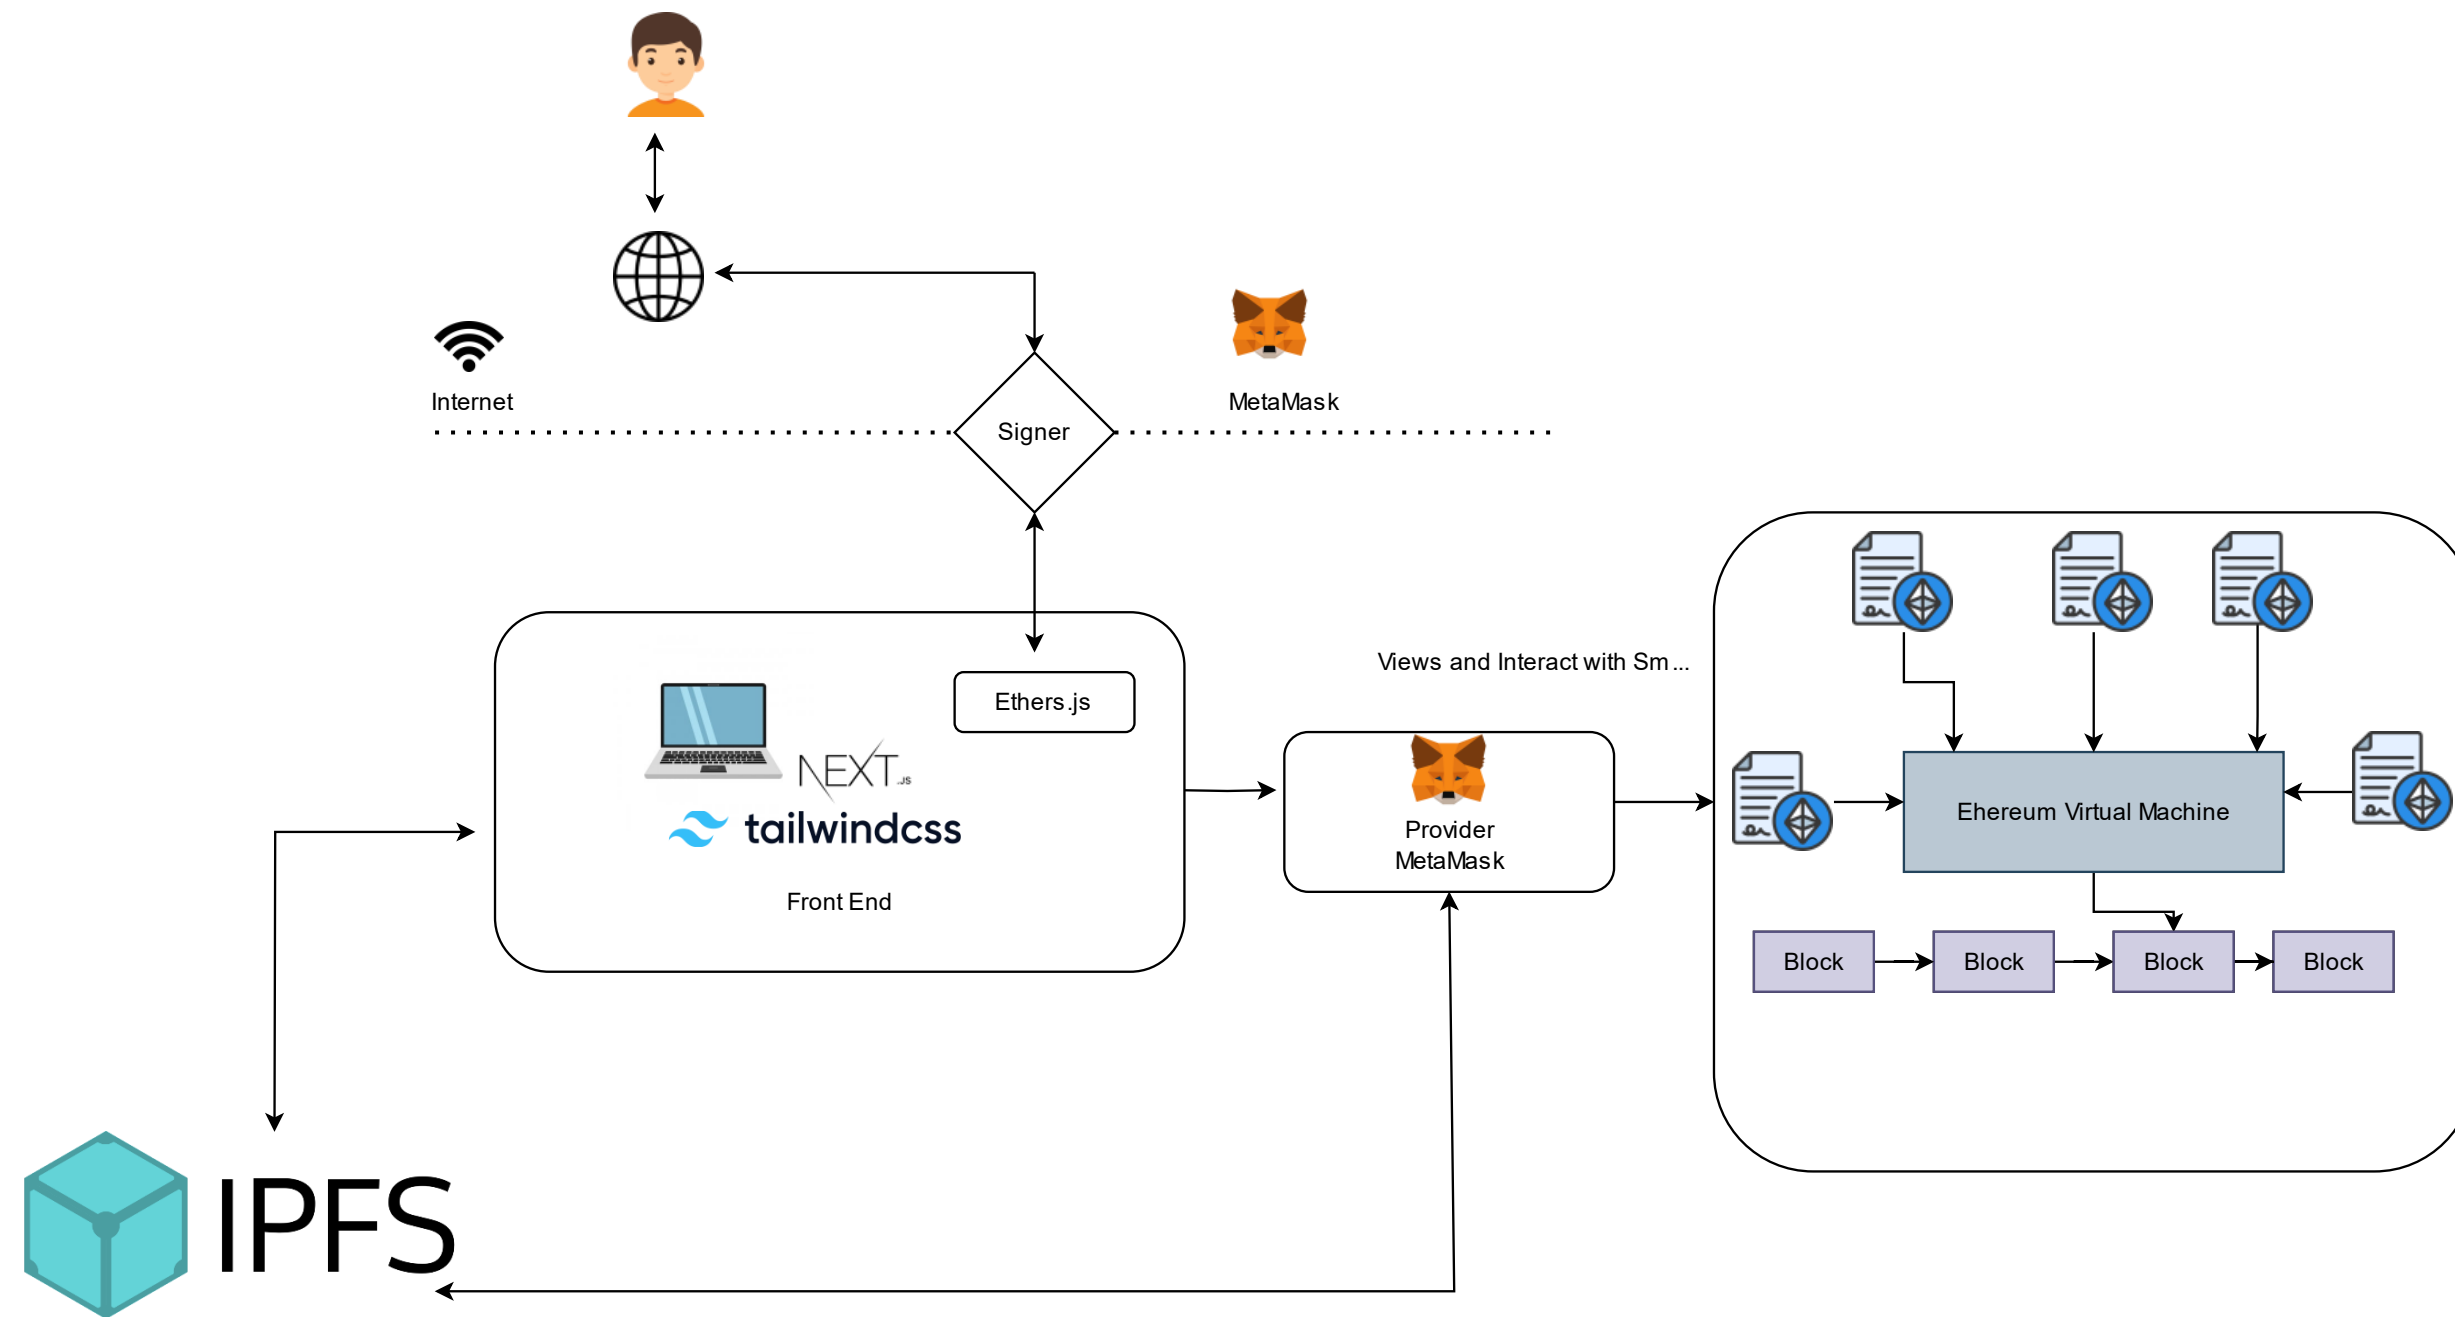

NoSQL database for flexible and scalable
user data storage.

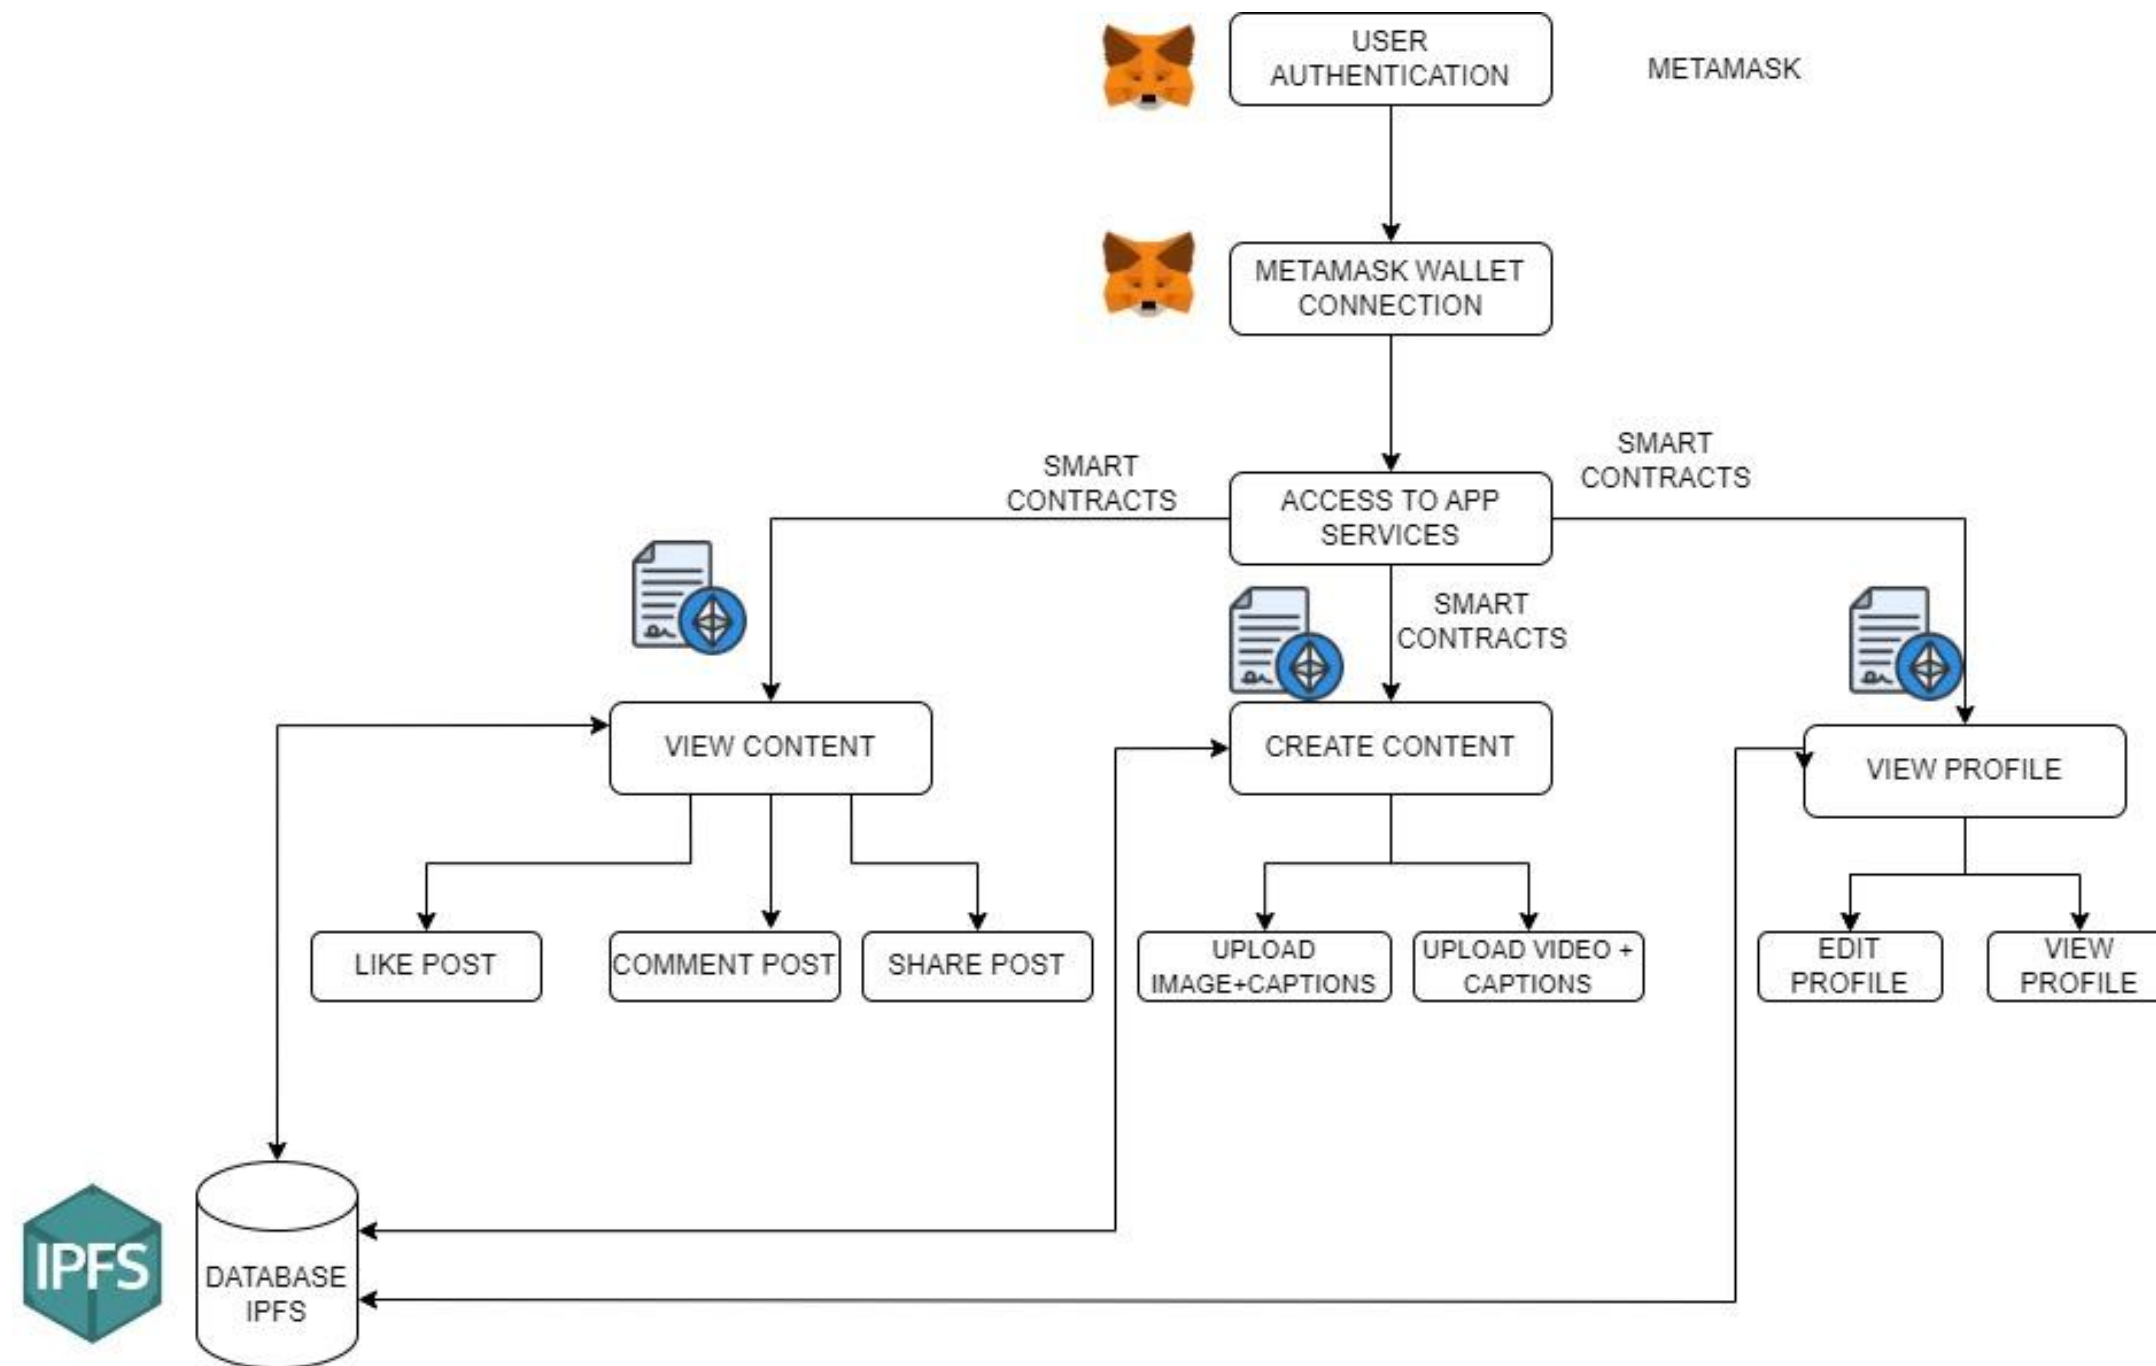

Ethereum's go-to framework for streamlined
smart contract development, testing, and
deployment.

ARCHITECTURE

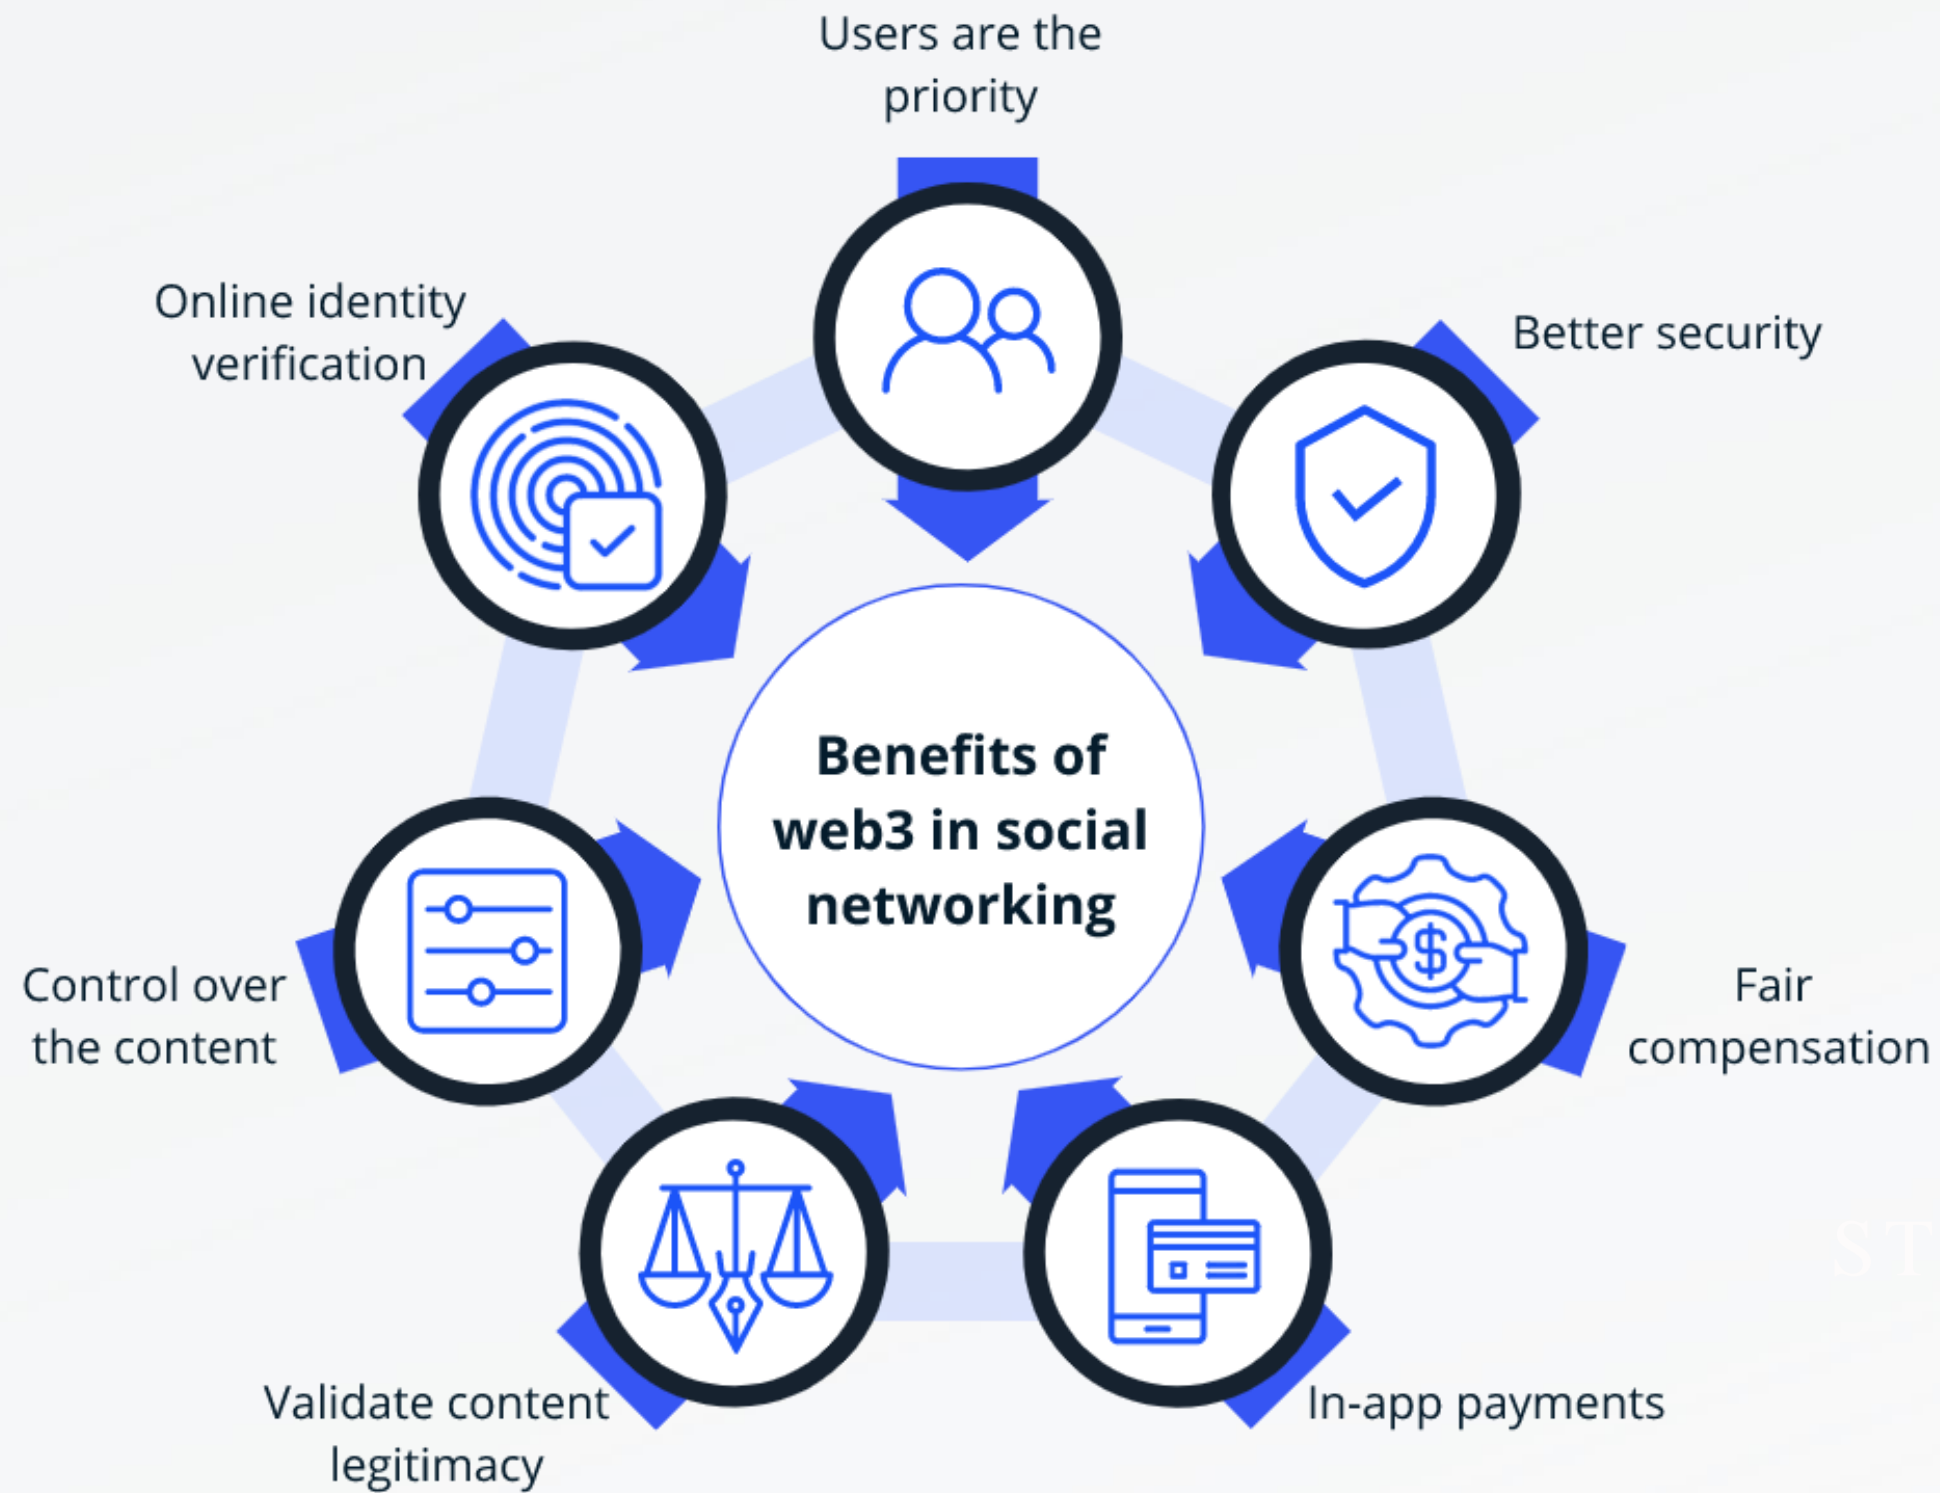

Text is not SVG - cannot display

PROCESS FLOW

BENEFITS OF WEB 3.0

STRATEGY
IN 2023

CONCLUSION

- Surpassing Web 2.0, our decentralized platform ensures superior user privacy and content ownership, reshaping digital interactions.
- Next.js, Solidity, MongoDB, and IPFS empower users with unprecedented control, departing from centralized norms.
- Paving the way for a user-centric future, our project stands out in its commitment to security and transparency.
